

KIDS just love HOT TUBS and who doesn't

PORTABLE SPAS - HOT TUBS

Taking comfort to a new level..

IQue invented the Triple Thermal Shield Insulating System in 2010 and have been perfecting it ever since. We will also continue doing so for perfection, aiming at being the most efficient energy saving system for Hot Tubs.

But progress in insulation and energy efficient system doesn't need to be limited, we are also aiming to become the most service friendly, comfortable and durable Crystal Clear & Pure Water Hot Tub supplier ever.

IQue Hot Tub - Spa program, that provides everything you need to relax, rejuvenate and enjoy in complete comfort.

So let us show you how easy it is to turn your dreams of the ideal Hot Tub - Spa into reality.

***What are you waiting for, join
now....***

A IQue Hydro Therapy build Hot Tub will help you work, feel and sleep better !

Soothe Tired and Aching Muscles

Soaking in an IQue Hot Tub makes collagen tissue becoming more flexible, benefiting many people with arthritic symptoms. Blood pressure will be lower, it is also proved that people with diabetes will be improved with lowering their blood sugar level.

Relieve Stress & Relax

When you're relaxing, you enjoy life more. It is easier to converse, share intimacies, smile and laugh. As a result, you are looking forward to use your Hot Tub again.

Sleep Better

The heat, improved blood circulation, tension relief and quicker lactic acid removal will result in comfortable state of relaxation and tranquility, assisting you to sleep better.

“Electronic soft and user friendly touch control”

IQue uses the world leader USA Balboa Systems.

It provides easy to use reliable electronics and electrical system, and tested for usage in hot and cold climates.

Furthermore, a stainless steel heater is installed. This corrosion free 3kW heater warms up the water quickly and efficiently maintains your favorite water temperature.

Finally, to purify your water, an ozonator is installed that efficiently “kills” bacteria and virus.

“Triple Thermal Shield” Energy efficient insulation

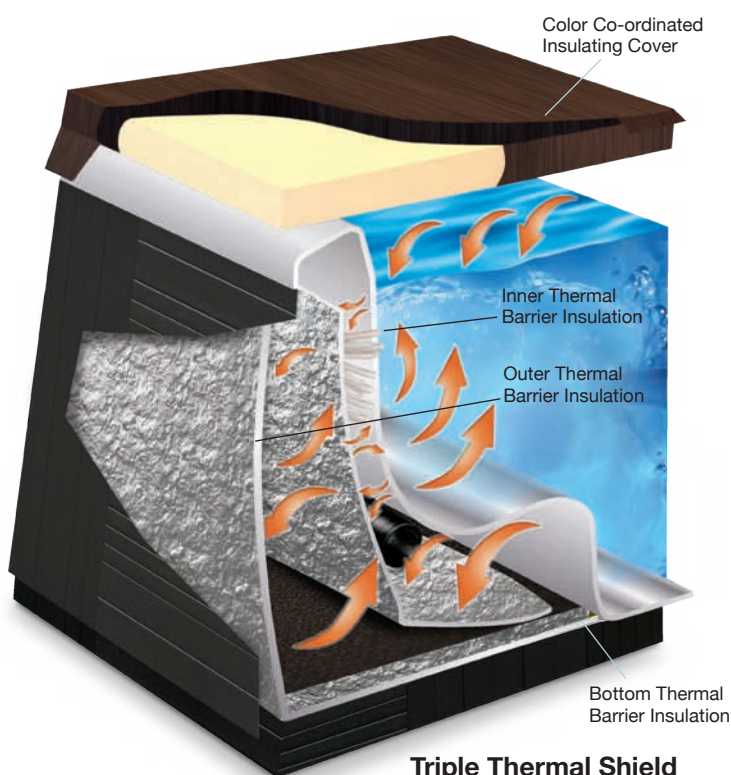

Energy efficiency is the top of the mind for all consumers. IQue Hot Tub has taken every single step to make our Hot Tubs as efficient as possible.

IQue Hot Tub is amongst the most energy efficient Hot Tubs on the market.

Our “Triple Thermal Shield” is not only the most efficient insulation, it also provides easy access if service is required.

Furthermore, it provides mounting space for multiple components.

Using the latest thermal technique, IQue delivers the ultimate in energy efficiency, saving your electricity bill.

The Basics in Hot Tubs perfect building processes

Strength - Durability

We thermoform our Hot Tubs using the best available USA made acrylics.

Our thermoforming machinery is developed for Hot Tubs thermoforming with temperature zone, where heating can be adjusted for individual Hot Tub model and gives best results.

Our Hot Tubs' recesses, seats and lounge are perfectly thermoformed. Then we reinforce it with easter vinyl to ensure perfect bonding. No delimitation, cracks or blisters in our Hot Tubs. Up to six layers of polyester based fiberglass is then applied to make the strongest Hot Tub shell in the industry.

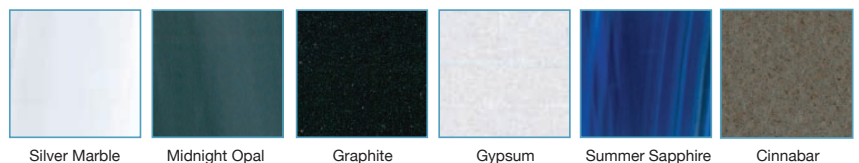

Strength - Durability Forever Lasting

After reinforcement, drilling, jetting and plumbing we add a strong wooden frame.

The frame structure supports the Hot Tub vertically and horizontally which is a very strong and durable support base. Furthermore, each seat and lounge is also individual wood supported. We are proud to say that our Hot Tubs are among the strongest in the world.

Acrylics from Aristech USA
When Quality is important

Our Standard Colors

The Basics in Hot Tubs perfect building processes

Sub Assembly

To ensure the highest possible quality and efficient production flow, sub assembly is an important part of lean manufacturing.

With sub assembly, we reach the highest possible quality standards. Sub assembly minimize human mistakes. Once sub assembly is done in the correct way, ensures only one assembly mode.

Consistency in installation work is of highest importance. Every single IQue Hot Tub that leaves our factory is made for long lasting life time.

Sub assembly also ensures a non leakage Hot Tub as all glue joints are being done long enough to ensure curing before the Hot Tubs reaching water test stations.

Plumbing

High flow, triple fastened manifold plumbing.

IQue Hot Tub is hydraulic balanced to deliver maximum water flow at the jets, at the same time delivering a smooth and quiet experience.

Plumbing joints are glued onto barbed fittings and further secured with stainless steel clamps.

Furthermore, each manifold is secured and anchored to the Hot Tub shell. By doing so, we ensure that the forces from water pressure and flow, cannot cause the manifolds to move and thereby causing leaks.

“IQue Hot Tub is perfectly manufactured”

Superior Design

Every effort has been made by our R&D team, engineers and designers to provide the ultimate in comfort, safety and versatility.

We are confident that you will enjoy the most comfortable IQue Hot Tub in the market. IQue offers all what you can expect, even more than any other hot tubs in the industry.

Take your time to jump into one of our Hot Tubs, feel the differences, feel the high quality in all details. We really want you to compare IQue Hot Tub against other hot tubs in the market.

Once you notice that all our jets are completely recessed, you can rest in any of our seats or lounges and you will only feel the high comfortness, no jets sticking into your back.

“Comfort is what we deliver”

Lean Manufacturing

We continuously improving with the Lean Manufacturing Technology. Designing and reconfiguring the manufacturing system. Setting up reductions, chasing methods and changing designs of tooling and dies to reduce set up time.

Integrate Quality Control into the manufacturing system. Empower every operator to involve in inspection to prevent defects.

Integrate Preventive Maintenance. IQue makes machines and people reliable and dependable.

Leveling and balancing the manufacturing, smoothing the material flow. Synchronizing the sub assembly wherever necessary. Adoption of Kanban Manufacturing Supermarket Technology.

Water And Functional Test

Water and functional test are one of the most important stations. In this station we add electronic components and audio systems if ordered.

We start the test with filling the Hot Tub and leave them overfilled for a overnight leakage test. Each IQue Hot Tub will stay in this static test for at least 12 hours.

Next step is the flow pressure test, here we have closed all jets in each zone. Then we start all pumps and check for leaks thoroughly.

Then it follows with a number of electronic tests, including the hot pot test. After that, the operator will complete the checklist and sign. Now the IQue Hot Tub will travel to the final cleaning station and finish with shining touch.

“Superior High Quality Hot Tubs”

Final Quality Check

Detailing and drainage of water is the final step before packing. We start to drain the Hot Tub using advanced vacuum and drainage equipment.

Upon delivery, the IQue Hot Tub arrives fresh and without any freezing possibilities if the final destination is a cold country. Once the Hot Tub is drained, detailing operators will check both the interiors and the outsides.

As a result, the IQue Hot Tub is being completely cleaned and superior shining glossy.

The dual final check is made by the Quality Inspector and Floor Manager. The IQue Hot Tub is now ready for packing and delivery.

Therapy Power Flex System

IQue massage technology allows you to adjust massage patterns and intensity from as little as you like to as much as you want.

Intensity can be adjusted individually, in group, by pressure, directionally and even by pump.

The choice is yours. You completely control the IQue Hydro Therapy action.

All Jets are perfectly positioned, water pressure and flow is balanced ensure all over body massage.

We are proud to introduce IQue Therapy Power Flex System, the best ever.

14-port Multi Massage Power Flex Jets
Provide deep tissue massage covering
a wider part of your body

Interchangeable Jets

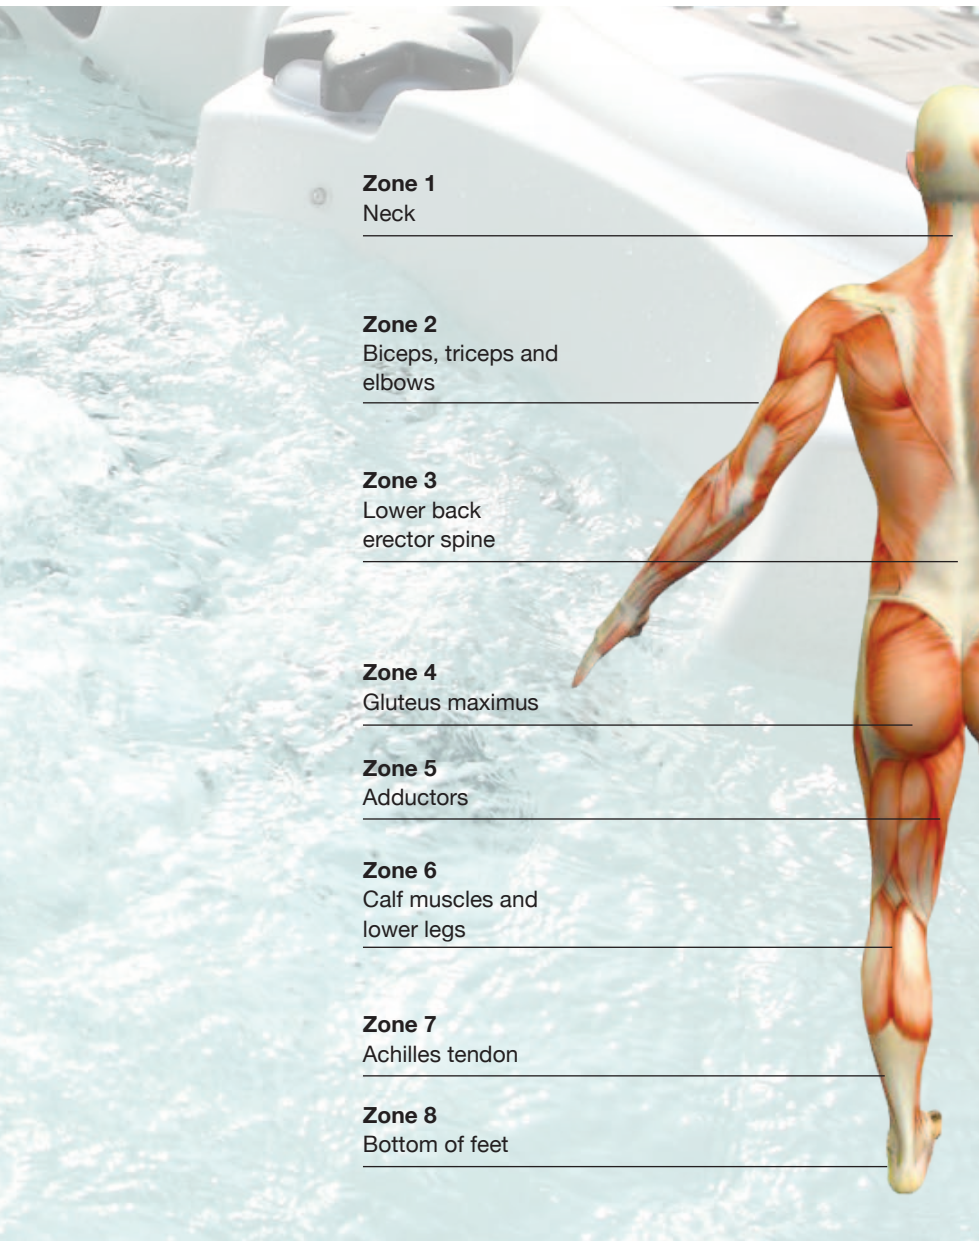

Jet inserts in the same size can be replaced by other functional jets. Then you can provide the unique massage on specific parts of your body. 14-port jets insert can be interchanged with "Spinner Power" or "Spinner Power with Directional Power".

"It is easy to change, just a twist with your hand".....

IQue Therapy Power Flex System

IQue Therapy Power Flex System covers all your needs.

Combined with warm water and IQue Therapy Power Flex System. IQue Hot Tub massage improves circulation, alleviate tension, allow you to move fluidly, and assists in improved sleep and reduce anxiety.

A good Reflexology Foot Massage is an incredible healing force that can help reduce many symptoms such as headache, insomnia, chronic fatigue and dizziness. It also treats the underlying cause of many internal diseases such as Liver disease, Kidney disease, Heart disease and High blood pressure.

IQue reflexology foot massage technique is also one of the most enjoyable experiences that you can have. A proper foot massage is one of the strongest stress relieving treatments and is a great way to end a full body massage.

IQue 100 % Superior Cleaning Hot Tub

Superior Cleaning System

IQue use dual filters for Platinum & Diamond Series

- **Skimmers** - Water from the surface of the Hot Tub is being drawn into to the skimmer by the pump.
- **Pre-filter** - The pre-filter traps large particles and removes them prior to entering the Hot Tub filter system.
- **Floor vacuum** - Dirt that sinks to the bottom is drew into the filters.
- **Micro filter** - The filter removes particles efficient before the water goes back into the Hot Tub.

IQue uses smart technology to ensure the cleanest and purest water in the Hot Tub industry.

The water is being filtered from both bottom and surface.

No more worries about maintaining the Hot Tub frequently, IQue 100 % Superior Cleaning System will take care about it.

IQue's Superior Cleaning System cleanses 100% of the water approximately 5-6 times per hour depending on the size of the Hot Tub.

IQue's filtration pump is one of the best in the market. It saves energy cost by using only 50% of the revolution that other pumps use. It is efficient, silent and reliable.

With dual filters installed in IQue Platinum & Diamond series, you will have the purest, cleanest and clearest water.

***"IQue delivers
High Quality Hot Tubs"***

How others are filtering

With most other hot tubs, more than half of the water bypasses the filter, resulting in surface cleaning only.

With no floor filtration, only the surface water is filtered and the user needs to regularly vacuum the bottom of the Hot Tub.

Additionally, there are more water bypassing the filter and is recirculated into the Hot Tub without being cleaned.

***"Crystal Clear & Pure Water
100% Filtration only in IQue Hot Tub"***

IQue Hot Tub is available in Four Series

IQue Hot Tub gives you the options to choose a Hot Tub from two up to seven persons. All of them is with superior comfort and strength to suite your needs. Furthermore, IQue offers some of the most comfortable underwater seating available today.

Slip into our luxury lounges and you will immediately notice the high quality construction and comfort. IQue massage technique is one of the best you can find in any hot tub worldwide.
